Re: The Finnish Industry Opinion on the Working Group Memo  
of the Ministry of Social Affairs.

Dear Sirs,

Please find enclosed a copy of the translation I recently received from the local BAT company.

The translation by no means gives justice to the Finnish original. I have taken the liberty of scratching a few corrections by pen here and there, without taking the time to rewrite the translation in order to be able to forward the material to you as soon as possible.

I hope that also you will find the presentation acceptable.

It is a historical document in so far as being the first time the Finnish tobacco industry has put down on a filed document detailed opinions on proposals by the health authorities.

It will be more than interesting to await the effect of this document and on changes to come.

I have registered my work on helping to bring along this document as a business separate from my running consulting to the Philip Morris Group.

As the document now is finished and filed I take the liberty of enclosing my statement, showing Fmks. 10.543:40 in our favour.

Yours very truly

Christian Reims
